ABOUT

Final-year IoT student deeply passionate about Software Development

ACADEMIC PROJCTS

HMKSOCIALHUB
MARCH 2023 - APRIL 2023

HMKSOCIALHUB is a Django-based social networking website allowing user registration, profile management, and interactions such as following, searching, and liking posts. User profiles require essential information like a valid username, email, profile picture, bio, and location. The platform also features admin controls for CRUD operations and user profile management, with data storage handled by PostgreSQL and Cloudinary.
GitHub repository

HelmiPredico
APRIL 2023 - MAY 2023

HELMIPREDICO is a mobile app built with Flutter and Firebase for convenient medical appointments. Users can sign up and log in to access the app's features.
