# Helmi Lakhder

I am currently a second-year IOT student. I am constantly learning and updating my skills to stay up-to-date with the latest technologies and trends in the industry, and deeply passionate about building backend systems and solving problems,I thoroughly enjoy working with various data structures, including arrays, linked lists, stacks, queues, trees, and graphs.

## PROJECTS

### SocialNetworkingWebsite

**MARCH 2023 — APRIL 2023**

- HMKSOCIALHUB is a social networking website where users can register, log in, and edit their profiles. They need a valid username, email address, profile picture, bio, and location. The site has an admin role for CRUD operations and managing user profiles. Users can follow others, search for users with keywords, and see and like posts.
- The website is built with Django, Python, and uses PostgreSQL & Cloudinary for data storage.
- GITHUB REPOSITORIE

### MedicalMobileApp

**APRIL 2023 — MAY 2023**

- HELMIPREDICO is a mobile app built with Flutter and Firebase for convenient medical appointments. Users can sign up and log in to access the app's features. They can easily browse and view available doctors, engage in direct chat conversations with them, and schedule appointments. HELMIPREDICO streamlines the process of finding, communicating with, and booking appointments with medical professionals, ensuring a user-friendly experience
- GITHUB REPOSITORIE
